FOREWORD

Evan Tse

President
Hong Kong Optical Manufacturers Association (HKOMA)

Hong Kong eyewear manufacturers possess rich experience in producing high quality eyewear with innovative design and fulfilment of international standards for renowned international brands.

Due to the pandemic outbreak, consumers have changed their buying behaviours and dramatically switched to online channels as one of their solutions. Companies, industries and economies have responded in turn. On the other hand, organisers of trade fairs and exhibitions have switched to host the events in hybrid mode. Online channels will be the supporting materials to provide an image or a 3D model on screen, and meanwhile traditional face-to-face exhibitions will still keep remain as an essential warm up for carrying emotional weight and making businesses in this traditional industry.

In this view, in order to stay competitive in this new business and economic environment, all industries require new strategies and practices. Hence, innovative 3D technologies will be helpful to this scenario. It is hugely beneficial to various industries since 3D technologies have been fully adopted from design, visualization, manufacturing, marketing and commerce. With the aid of 3D technologies and 3D designs, eyewear manufacturing businesses will face a huge change over, from design stage to marketing stage.

Given the aforementioned considerations, Hong Kong Optical Manufacturers Association (HKOMA) and Hong Kong Productivity Council (HKPC) both join hands to formulate the latest technologies applications, tools and exhibitions to demonstrate their 3D designed eyewear originated from Hong Kong, called "Visual Impact - Hong Kong Eyewear 3D Design". We wish the project would further advance the development of Hong Kong eyewear industry and achieve greater regional influence by showcasing a group of remarkable local 3D eyewear designs in exhibitions and any other promotional materials.

Meanwhile, this is also an important milestone for Hong Kong eyewear industry to explore eyewear design talents and enhance potential development of eyewear by demonstrating latest and trendy eyewear designs with the utilization of 3D technologies during the international exhibitions.

序言

謝小雁

香港中華眼鏡製造廠商會 會長

香港眼鏡製造商憑著豐富經驗，為國際知名品牌生產設計新穎、符合國際標準的優質眼鏡。

由於新冠疫情大流行的爆發，消費者已經改變了他們的購買行為，並大幅轉向以在網購作為他們的其一購物渠道。無論是公司、行業和經濟體等都陸續跟隨作出了配合。另一方面，交易會和展覽會的主辦單位亦紛紛轉向以線上線下的混合模式舉辦活動。而線上平台亦成為在屏幕上提供圖像或3D模型的展示渠道，同時傳統的實體展覽會仍因為承載情感交流因素而將繼續舉行，特別在這傳統的行業，是開展業務的必要熱身門檻。

在這種觀點下，為了在這個新的商業和經濟環境中保持競爭力，所有行業都需要新的戰略和實踐。因此，創新的3D技術將有助於這種營商情況。由於3D技術已從設計、可視化、製造、營銷和商業中得到充分採用，因此它對各個行業都大有裨益。借助3D技術和3D設計，眼鏡製造企業將面臨從設計階段到營銷推廣的巨大轉變。

基於上述考慮，香港中華眼鏡製造廠商會 (HKOMA) 和香港生產力促進局 (HKPC) 攜手舉辦一項最新的3D技術應用的推廣項目，展示源自香港的3D設計眼鏡，名為“視覺衝擊 - 香港眼鏡3D設計”。我們希望能通過這項目在展覽會和其他宣傳媒體中展示一批卓越的本地3D眼鏡設計，為香港眼鏡業進一步發展建立基石，和取得更大的區域影響力。

同時，這項目也是香港眼鏡從業在國際展覽會中利用3D技術展示最新、最流行的眼鏡設計，發掘眼鏡設計人才，提升眼鏡工業發展潛力的重要里程碑。

Product Introduction and Features 產品介紹及特色

The eyewear is the outcome of a mutually reinforcing relationship among imagination, passion and knowledge.

That unique spirit passes directly from the hand of the master craftsman, into the well-polished product itself.

眼鏡的設計充分體現想像力，激情和知識之間相互提升的關係。

這種獨特的精神直接從大師的手傳到精心打磨的眼鏡本身。

BIOACETATE S70

Name 姓名
May Ng

Contact 聯絡方法
(852) 3184 8934
may@bioacetate.com
bioacetate.com

Design Concept / Story 設計故事 / 概念

BioAcetate S70 (bioacetate.com) is a new and innovative material that aims not only to be good for the Earth but also good for performance.

The five main ECO-Advantages of BioAcetate S70 are as follows:

1. ISCC Sustainability Carbon Certification
2. 62 % biobased according to ASTM-D6866
3. Biodegradable according to ISO-14855
4. Harmful plasticizers free (NO DEP)
5. Biocompatibility according to ISO-10993

BioAcetate S70 (bioacetate.com) 是一種新型創新材料，不僅對地球有益，而且有良好的眼鏡性能。我們眼鏡還具有BioAcetate S70 5大生態優勢：

1. ISCC國際環保認證
2. 62%生物基 (根據ISO-14855)
3. 可生物降解 (根據ISO-14855)
4. 無DEP
5. 生物相容性 (根據ISO-10993)

Smart Audio Bluetooth Eyewear made with BioAcetate S70

The Smart Audio Bluetooth Eyewear made with BioAcetate S70 is designed to incorporate eyewear with modern technology. These glasses seek to offer technology, performance, and sustainability all in one for the consumer. The design is very special because it offers bone-conduction technology and an ergonomic structured design that is comfortable and well-fitting for consumers to wear.

這款用BioAcetate S70製造智能音頻藍牙眼鏡旨在將眼鏡與現代技術結合，為消費者提供了集技術、性能和可持續性於一身的產品。該產品設計非常特別，它提供了骨傳導技術，還有人體工程學的結構設計，讓消費者佩戴起來很舒適。

5 Loops (Germany) Punta Hermosa BioAcetate S70 Frame

The Punta Hermosa frame is designed for the brand 5 loops which is a German brand that is focused on sustainability.

The entire frame is biodegradable. Because of the technical properties of BioAcetate S70 frames which have hardness enhanced CA (HECA) properties, frames from 5 loops don't have a metal core wire inside them and are comfortable to wear.

Punta Hermosa鏡架是為德國品牌5loops設計的。整個框架是可生物降解的。由於BioAcetate S70鏡架具有硬度增強CA (HECA) 的技術特性，5 loops的鏡架內部沒有金屬芯線，佩戴起來非常舒適。

BioAcetate S70 Ultra-Thin Handmade Frames

HECA properties offer protection against deformity. Deformity in traditional CA may cause lens to fall out of frames or may cause temple/legs to be greatly uneven in height. BioAcetate S70 designed frames seeks to solve this. Also, it allows for more flexibility in designs.

BioAcetate S70設計的鏡架具HECA特性，更輕巧耐用，設計更加靈活且能防止變形導致鏡片從鏡架中掉出，或可能導致鏡架/鏡腿高度不均勻。

Product Introduction and Features 產品介紹及特色

Design Concept / Story 設計故事 / 概念

Our objective was to create the best folding business glasses. CEO-V, through superior design innovation and manufacture, takes the concept of foldable business glasses to a new level and bring more comfort and convenience to the users.

CEO-V是一個專為30至40歲專業人士打造，實用與品味相結合的眼鏡品牌。從外表上看只是普通的光學眼鏡，但實際上是一款非常實用的多功能專業眼鏡。它以嶄新的摺疊技術，配合高級物料貼心設計出專利的鏡臂，讓眼鏡能夠無時無刻地伴隨在你的左右。

The design of CEO-V features a patented system, the retractable sleeves allows the glasses to be worn around the neck without the need for a cord or chain. The magnets in both of the sleeves sticks well together to make sure it holds tight on head. Alternatively the CEO-V frame can be stored in an ultra-slim protective case. It also comes with a handy finger grip cleaning cloth to ensure your eyewear is always clean.

CEO-V眼鏡由金屬鏡框與可伸縮的鏡臂組合而成。CEO-V的鏡臂可折疊與展開，並用專利鏡臂尾部的磁石將兩臂連接，在不使用眼鏡時可將它掛在脖子上，輕巧舒服。眼鏡盒的設計令顧客有無重的感覺。眼鏡與盒子均是纖細的流線形設計，攜帶輕便，能輕易藏進西裝袋內，個性及時尚感十足。精心設計的手指眼鏡布更能輕易收藏及方便使用。

BIO-Nylon 環保尼龍

Bio-Nylon, an optical bio-mass materials, using a part of castor oil to supersede fossil oil. The characteristic and color performance of Bio-Nylon are very close to the normal nylon product.

環保尼龍產品是種一新世代的生物基光學級塑料，利用蓖麻油代替石油成份。
環保尼龍產品的物理特性，色彩表現都與一般的尼龍產品相約。

ELF 精靈之鏡

The traditional acrylic demo lens is not easily degradable. It is not an Eco-Friendly material for just a one-shot use.

ELF is designed for biodegradable product in aerobic conditions, which contains about 52% "bio-mass", further reduces the consumption of earth resources! Also, it is tested under ISO 14855, a standard testing method for determining the ultimate aerobic biodegradability under controlled composting conditions.

傳統的亞加力鏡框定形片難以分解，只用一次，用完即當成垃圾廢棄實在太浪費了。

精靈之鏡是一款專為 "有氧可生物降解條件" 開發的產品，含約52%的 "生物基"，進一步減少消耗石油資源！

並根據ISO 14855 "在受控堆肥條件下測定最終有氧生物降解性" 進行測試。

DYO material 迪奧之材

"Anaerobic and biodegradable" product.

Degradation is the process by which the material is broken down into small pieces but never completely disappears.

DYO material is a biodegradable plastic where the degradation results from the action of naturally-occurring micro-organisms such as bacteria, fungi, and algae in different environments, like composting environments, landfill, and Bioreactor.

No significant physical characteristics that are different from traditional plastic material.

Good compatibility with acetate frame, traditional injection plastic and metals. It enjoys the same shelf life and storage requirement as other traditional plastic.

由於傳統的塑膠難以分解，持續遞增不但加重堆填區的壓力，還會對生態環境造成嚴重污染。

迪奧之材是一種可生物降解的塑料，其降解是由細菌、真菌和藻類等天然微生物在厭氧環境 (堆肥環境、垃圾堆填區和生物反應器) 下的作用引起。

迪奧之材與傳統塑料的物理特性沒有顯著不同。

與醋酸纖維、傳統注塑塑料、金屬都具有良好的兼容性。保質期和儲存要求與傳統塑料相同。

whchung@uco.com.hk

Design Concept / Story 設計故事 / 概念

Hachill's main product is fashionable sunglasses, named after the Cantonese word "黑超", showing the brand's local characteristics. As an eyewear brand with local characteristics in Hong Kong, designers have been focusing on innovation and improvement, constantly making breakthroughs, keeping abreast of market trends and pursuing fashion, and designing personalized and exclusive glasses for each customer. In terms of design and production, we pay attention to the balance of material collage and functionality, delve into the geometric relationship between the bridge of the nose and the position of the nose pads, and cooperate with the brand's bold and innovative design style to create high-quality and fashionable glasses that are especially suitable for Asians.

Hachill 的主要產品是時尚太陽眼鏡，並以粵語「黑超」二字命名，展現品牌的本土特色。作為香港本土特色的眼鏡品牌，設計師一直專注創新改良，不斷突破，並緊貼市場潮流及追求時尚，為每一位客人設計出富個性的專屬眼鏡。在設計及製作上講究物料拼貼與功能性的平衡，深究鼻樑與鼻托位置的幾何關係，配合品牌大膽創新的設計風格，打造出特別適合亞洲人配戴的優質時尚眼鏡款式。

Hachill 黑超 - HC82116S-C2

The pink lens is outlined with a golden metal frame, matched with a large lens, the strong contrast between light and dark colors creates a special visual effect, and the transparent pink shape is lightweight, which makes people feel bright.

以金色金屬鏡框勾勒粉紅色鏡片，配搭大鏡片，明暗色彩的強烈對比營造出特別的視覺效果，透明的粉紅色造型輕巧，令人有眼前一亮的感覺。

Hachill 黑超 - HC82117S-C1

The classic aviator style is interpreted with a new frame through the exquisite line shape, and the drop-shaped lens is covered on the front frame, creating a sense of interlaced design of lines and lens, making the style more perfect.

透過精緻的線條造型將經典飛行員形以嶄新鏡框演繹出來，並將水滴狀的鏡片蓋於前框之上，營造出線條與鏡面交錯的設計感，使款式力臻完美。

HKOMA - Mail Box C1 香港情懷 - 信箱

Since the 1960s, galvanised iron mailboxes have been an iconic feature of Hong Kong, representing the connection between people. The pattern on the mailbox is an old Hong Kong coin. Whenever the postman sends a letter, it means to send luck to every household. We incorporate this design concept into eyewear products, hoping to bring fortune to users.

從60年代開始，自鐵信箱已經是香港標誌性的特色，代表着人與人之間的聯繫，信箱上的圖案是香港舊有錢幣，每當郵差派信時，寓意把幸運派到每戶大家手中，我們將這個設計概念融入眼鏡製品中。

HKOMA - Checker C3 香港情懷 - 棋

The checker is one of the table games suitable for all ages in Hong Kong. It accompanies us to grow up. Through the purple color that has always been popular among ladies, matched with a large round retro eye-rim and wave chessboard pattern design on the spectacle arms. It will let users instantly go back to the wonderful days with their family.

波子棋是香港老少皆宜的遊戲之一，陪伴我們成長，透過一直深受大眾女生喜愛的紫色，配上大圓形復古前圈，以波子棋盤花紋設計的鏡臂，令配帶者瞬間回到過去與家人一起玩樂的美好時光。

HKOMA - MTR 香港情懷 - 港鐵

The MTR is one of the important mass transportation systems in Hong Kong. The exclusive colors and artistic beauty of traditional Chinese characters in each MTR station have attracted the attention of many passers-by and become a check-in hotspot. Depending on this design concept, the name of the MT station is engraved on the spectacle arms, so that the users can admire the unique design features of the subway - MTR Sung font on the eyewear.

港鐵是香港重要的主要交通工具之一，每個港鐵站內的專屬顏色和繁體字藝術美感吸引了很多途人注目，成為打卡熱點，是次設計把港鐵站名稱刻在鏡臂上，可以欣賞到獨有的地鐵宋體字設計特色。

Design Concept / Story 設計故事 / 概念

IMPAKT concept has been inspired by the Nike AirMax bubble concept which is usually in the heel where the most impact protection and cushioning are needed to take comfort next level. With each step, pressure is applied to the Air units, which absorb and release energy as you step off. The Air unit then goes back to its original shape.

This concept illustrates by analogy a tangible feeling of self protection from the outside world.

IMPAKT的概念源自Nike AirMax的氣泡概念，透過具有最大的衝擊保護和緩衝的鞋蹕來把舒適度提高到新的水平。每走一步，壓力都會施加到Air氣墊上，當你離開時，Air氣墊會吸收和釋放能量，隨後恢復到它原來的形狀。

這個概念說明了一種來自外界的自我保護的切實感受。

KO KElfRED
OPTICAL LTD
Manufacturer Exporter

ONDA concept has been inspired by fluid waves. A wave is a repeating pattern. It repeats itself in a periodic and regular fashion over both time and space. And the length of one such spatial repetition (known as a wave cycle) is the wavelength.

This concept illustrates the inconsistencies of life, full of paradoxes and contradictions. Up and down.

ONDA的概念源自於流體波浪。波浪是一種重複的模式，它在時間和空間上以周期性和規律性的方式不斷重複，而當中每一個間隔的長度(被稱為波浪週期)就是波長。

這個概念說明了生命的不一致性，充滿了悖論和矛盾，起落不斷。

BX2 concept has been inspired in Cubism art mouvement. A new approach showing reality through geometrical shapes and deconstruction. I wanted to show things as they really are - not just to show what they look like.

BX2的概念源自立體主義藝術運動，是一種通過幾何形狀和解構顯示現實的新方法。我們想展示事物的真實面貌 - 而不僅僅是展示它們的了表面模樣。

bTd - Mini shop of bespoke eyewear bTd - 定制眼鏡Mini shop

A bTd mini shop is in the form of a POP (point of purchase) eyeglasses samples display to be shown inside the show window of an optical shop. Number of samples shown from 6 up to 50 pcs, so user can change the models, or colors, size, form, etc. of each models components until finally getting a custom designed model.

Mini shop所展示的是兩組典型bTd品牌的[無框+框]結構: 每組由三副眼鏡組成, 但都是用一模一樣的鏡片和度數, 只是其他的所有部件, 包括中梁, 鏡臂, 鏡框等等都可隨意更換, 而鏡框的裝拆, 特意設計成容易更換, 於是顧客可以自由選購只要一副無框眼鏡, 加上不同的鏡框, 就能每天佩戴不同造型的眼鏡, 適應不同場合。

bTd®

bTd - Changeable eyewear A2201, A2202, V0072 bTd - 百變眼鏡A2201, A2202, V0072

The 3 models use the same pair of lens, so bTd can let every user change his eyeglasses look everyday and form a FAMILY with 3 members.

以上三款眼鏡是用同一對鏡片, 裝上不同的部件, 變身成爲三款不同的眼鏡, 適應不同的場合。

Weightless Rimless Model V2461 超輕無框系列Model V2461

Super elastic ultra thin titanium wire is chosen to construct the frame to solve the dilemma of light weight and reliability.

以這個“超輕無框”系列爲例, 采用超彈特細的B鈦綫作主要基材, 以解決超輕但又要功能可靠的矛盾要求。

該發明已獲得歐洲專利。歐洲專利號 3048470

European patent has been granted in respect of the invention.

European patent No. 3048470

Product Introduction and Features 產品介紹及特色

Design Concept / Story 設計故事 / 概念

MINIBOXX is a new line of glasses that are designed specifically for children aged 4 to 12. The designers behind MINIBOXX are well aware not only the appearance and the colour of the frame are both significant factors when buying children's eyewear, it is also essential to consider the fitting of the frame and their durability as well.

MINIBOXX是專為4至12歲兒童設計的全新眼鏡系列。MINIBOXX背後的设计師深知，在購買兒童眼鏡時，不僅外觀和鏡框顏色都是重要因素，還必須考慮框架佩戴的舒適性及其耐用性。

In addition to its playful and colourful style, MINIBOXX places equal importance on its practicality and functionality as well. Extendable temples are made of stainless steel and rubber. This feature acts as a secure loop to prevent the glasses dislodging from children's face.

As most children are active and unaware of contact impact when engaged in sports, this concept proves to be a must-have feature for the safety of children. The length of the secure loop is adjustable so that the users can wear the glasses around the neck making them less cumbersome when it comes to mobility.

MINIBOXX除了俏皮多彩的風格外，同樣重視實用性和功能性。可伸縮鏡腿由不銹鋼和橡膠製成。此功能可作為安全環，防止眼鏡從兒童臉上脫落。

由於大多數兒童在從事運動時都很活躍並且沒有意識到接觸影響，因此這一概念被證明是確保兒童安全的必備功能。安全環的長度是可調節的，因此用戶可以將眼鏡戴在脖子上，從而在移動時不那麼笨重。

Design Concept / Story 設計故事 / 概念

TIDOU Eyewear was founded in 2014, And then invited Italian eyewear design company Frameworks Design to participate in brand creation and design. After two years of research, development and improvement, the brand's patented structural design was created. It debuted at the Milano Eyewear Show in 2016, becoming the first designer brand integrating European and Asian styles. With its simple style and unique structure, TIDOU Eyewear quickly opened up multi-national markets in Europe and the United States. New Creation International (HK) Ltd. Also started operations in the Far East the following year, and has now successfully expanded into more than 20 countries. There are more than one thousand sales points worldwide.

TIDOU Eyewear 蒂杜眼鏡創立於2014年，及後邀請意大利眼鏡設計公司 Frameworks Design 參與品牌營造及設計，歷經兩年時間的研發及改良，創作出專利結構設計，並於2016年 Milano Eyewear Show 意大利眼鏡展首次亮相，成為首個融合歐洲及亞洲風格的設計師品牌。TIDOU Eyewear 蒂杜眼鏡以簡約風格，配合獨有的結構，在歐美地區迅速打開多國市場，New Creation International (HK) Ltd. 於次年亦開始遠東區業務，目前已成功開拓超過二十個國家，全球的銷售點亦已超過一千個。

Product Introduction and Features 產品介紹及特色

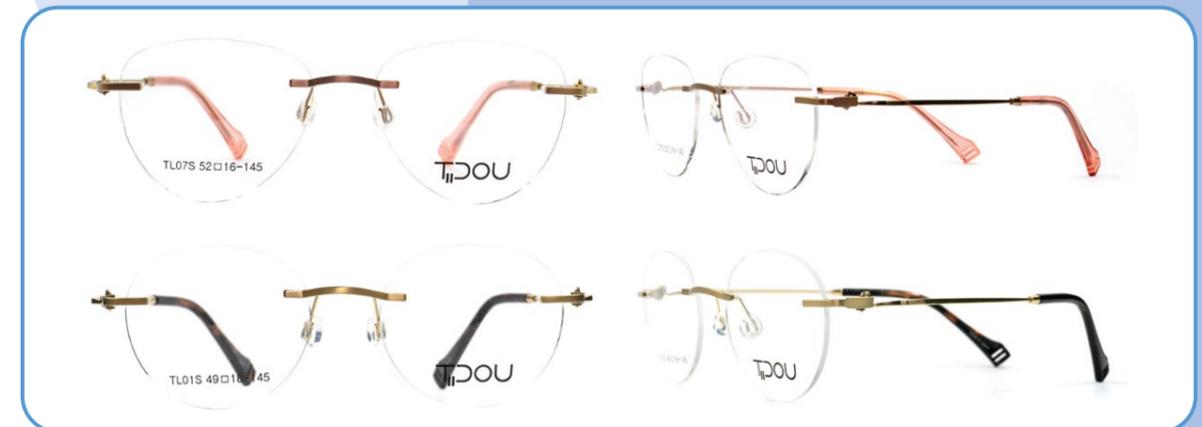

The design concept of TIDOU Eyewear comes from our life. The inspiration comes from the products in our daily life. The designer uses the principle of the plastic buckle on the backpack, so that the frame and the temples do not need to use screws and burnt to assemble. Meanwhile, the frames and temples have different and changeable combinations. The basis of the design is lightness and simplicity. The lightest frame of TIDOU Eyewear glasses is only 4 grams, which is as light as a tissue. The extraordinary structure provides fast and simple assembly. Each TIDOU glasses has a unique suspension "II" signature. Under this design, structure patents in many countries have been obtained.

TIDOU Eyewear 蒂杜眼鏡的專利設計概念源於生活，在日常生活用品中得到啟發；設計師利用背包的塑料插扣原理，使鏡框和鏡腿不需使用螺絲和燒焊來組裝，獨特的結構提供快速而簡單的裝嵌，同時增加鏡框和鏡腿多變的組合，並已成功取得多個國家專利。設計的基礎在於輕巧，TIDOU Eyewear 蒂杜眼鏡最輕的鏡架只有4公克，媲美一張紙巾，所有的款式以簡約細膩為基本，精緻的做工讓使用者得到最舒適的體驗，沒有花里花哨，給人簡潔的視覺效果。TIDOU Eyewear 蒂杜眼鏡簡單的暫停“II”標誌，包含著非凡的意義，使設計的概念融入結構之中，互相結合帶來唯美的藝術品。

TL07SC7, TL01SC1

Rimless Titanium Optical Frames - Lighter than ordinary frames, allowing the wearer to experience unlimited vision, professional appearance, especially noble.

無邊鈦光學鏡架 - 比有框架更加輕巧，令配帶者感受到無限視野、外型專業、高貴。

Acetate Titanium Optical Frame - Lightweight, Stylish Design, Chic Circle Pattern.

醋酸鈦光學鏡架 - 輕巧、時尚設計、別緻圈型圖案。

Metal Eyewear Frame - Glitter powder Collection 金屬眼鏡架 - 閃粉系列

This spectacle frame designed for women, the concept comes from the starry sky.
此款為女性設計的眼鏡框，概念來自星空。

Product Introduction and Features 產品介紹及特色

This frame the effect of pit pattern is made on the rim, and glitter powder is added to create the effect of starry sky. The second feature is in terms of function, adding flakes on both sides of the frame, For example, when the user is equipped with a lens for deep myopia, the appearance will not be affected by the lens being too thick.

此眼鏡框在圈線上做出坑紋效果，加上閃粉，營造出星空的效果，第二個特是在功能上，在鏡框兩側加上薄片，如用家在配上深近視片時，不會因鏡片過厚而影響外觀。

Metal Eyewear Frame - Automobile Collection 金屬眼鏡架 - 汽車系列

The concept of this spectacle frame designed for men comes from the front of the car. The designer added the shape of the front of the car to the frame to make the frame more masculine.

此款為男性設計的眼鏡框，概念來自汽車的前檔，設計師把汽車前檔的型態加入鏡框上，使鏡框更具男性風格。

Product Introduction and Features 產品介紹及特色

This spectacle frame is equipped with guards on both sides of the ring line, just like the front of a car with a surround, and the two-color effect that protrudes from the surround makes the eye frame more three-dimensional. The second feature is that it is functional. Surrounded on both sides of the frame, if the user is equipped with a deep myopia lens, the appearance will not be affected by the lens being too thick.

此眼鏡框在圈線上兩側加上護檔，像汽車前部加上包圍一樣，加上包圍上凸出的雙色效果，使眼框更有立體感，第二個特是在功能上，在鏡框兩側包圍，如用家在配上深近視片時，不會因鏡片過厚而影響外觀。

P2049 Material : S70

S70 is a material for sustainable. After usage, BioAcetate S70 can be recycled or undergo biodegradation.

For eyewear production, BioAcetate S70's high density is anti-brittle and has highly reduced material cracking during the CNC and tumbling phase.

BioAcetate S70 brings out Smiles because it is not only better for the Earth but it is also better for your Health.

S70是一種可持續材料。使用後BioAcetate S70可以回收或進行生物降解。

對於眼鏡生產，BioAcetate S70高密度是抗脆性的，並且在CNC及滾桶階段大大減少了材料斷裂。

BioAcetate S70讓您帶出喜悅，因為它不僅對地球好，更可為您的健康生活帶來保護。

Product Introduction and Features 產品介紹及特色

For unisex market
主要是中性市場

P2024 Material : rPET

PET plastic, found in your daily beverage bottles, is one of the most recycled plastics today. Despite its controversial reputation, not only is PET a versatile and durable plastic, but recycled PET (rPET) has evidently resulted in a much lower environmental impact than its virgin counterpart. That is owing to the fact that rPET reduces oil usage and greenhouse gas emissions associated with virgin plastic production.

rPET, short for recycled polyethylene terephthalate, refers to any PET material that comes from a recycled source rather than the original, unprocessed petrochemical feedstock. Originally, PET (polyethylene terephthalate) is a thermoplastic polymer that is lightweight, durable, transparent, safe, shatterproof, and highly recyclable. Its safety is primarily evident in terms of being eligible for food contact, resistant to microorganisms, biologically inert if ingested, corrosion-free, and resistant to shattering that may be particularly harmful. It is commonly used as packaging material for foods and beverages - mostly found in transparent bottles. Yet, it has also found its way into the textile industry, usually referred to by its family name, polyester.

日常飲料瓶中的PET塑料是當今回收率最高的塑料之一。儘管聲譽頗具爭議，但PET不僅是一種用途廣泛且耐用的塑料，而且回收PET (rPET) 顯然比其原始對應物對環境的影響要低得多。這是因為 rPET減少了與原始塑料生產相關的石油使用和溫室氣體排放。

rPET是回收聚對苯二甲酸乙二醇酯的縮寫，指的是任何來自回收來源的PET材料，而不是原始的、未加工的石化原料。PET (聚對苯二甲酸乙二醇酯) 最初是一種熱塑性聚合物，重量輕、耐用、透明、安全、防碎且高度可回收。它的安全性主要體現在符合食品接觸條件、抗微生物、攝入後具有生物惰性、無腐蝕以及抗可能特別有害的碎裂等方面。它通常用作食品和飲料的包裝材料 - 主要用於透明瓶中。然而，它也進入了紡織行業，通常以其姓氏聚酯來指代。

Design Concept / Story 設計故事 / 概念

P-3024 Material : G850

G850 Rnew® is a high performance transparent copolyimide, partially based on renewable resources. This grade has been specially designed for injection molding applications, ideally suited for optic as high end eyewear frames.

Percentage of renewable carbon according to ASTM D 6866 : 45%

The materials are ideally suited for optical solutions with high-performance properties.

- Lightweight
- Transparency & clarity
- Flexibility for comfort and durability
- Environment stress crack resistant
- Chemical resistance
- Fatigue resistance
- Design freedom

G850 Rnew® 係一種高性能透明共聚酰亞胺，部分基於可再生資源。該物料專為注塑應用而設計，非常適合光學作為高端眼鏡架。

根據ASTM D 6866可再生碳百分比：45%

- 輕盈
- 高透明度，清晰度
- 具回彈性、耐疲勞
- 尺寸穩定性
- 抗沖擊性
- 耐磨損
- 耐化學性、和阻燃性

ULTEM

Invented by GE of the United States is a high-performance plastic plastic grease, excellent heat resistance 217°C ~ low temperature resistance -30°C, shape stability, not easy to deform; the US FDA (Food and Drug Administration) certification for human safety and non-toxic and in line with environmental protection ECO standards, so often used in aerospace materials, medical materials, high-precision electronic parts, combined with the above advantages, the frame has chemical corrosion resistance, long temperature, ultra-light, high strength, high memory, so it is also often called plastic steel tungsten titanium material. Stability: FDA certification for human safety and compliance and environmental ECO standards, so it is often used in aerospace materials, medical materials, and high-precision mechanical/electronic parts.

由美國通用GE公司發明是一種高性能可塑性塑脂，優異的耐熱性217°C ~ 耐低溫 -30°C，形狀穩定性，不易變形；美國FDA (食品藥物管理局) 認證對人體安全無毒與符合環保ECO 標準，因此常被用在航太材料、醫療材質、高精密度電子零件，綜合以上優點，鏡框具有抗化學性腐蝕，耐高溫、超輕、高強度、高記憶性，因此也常被稱為塑鋼鎢鈦材質。穩定性美國FDA認證對人體安全無虞和服合和環保ECO標準，因此常被用在航太材料、醫療材質、高精密度機械/電子零件。

Design Concept / Story 設計故事 / 概念

ZL0786

The concept came from the eyewear in 30's. The traditional round shape combined with the modern style. It brought the eyewear design from the vintage classic to modern.

以30年代復古鏡架設計為靈感，將經典圓形鏡框揉合時尚設計，融合成新的款式，從經典延伸出來的作品。

Product Introduction and Features 產品介紹及特色

The classic oval frame mixed with Flip-up classic round shape sunglasses in orange color sun lenses. It totally combined modern and classic elements by the designs.

經典橢圓形光學架，配上可隨意開合的時尚復古圓框橙色鏡片，時尚與經典的結合。

ZN0563

The sunglasses design concept came from antique art fashion in Europe. The metal bar in geometry pattern referred from the European antique accessories and decoration. It looks luxury and charming on the timeless designs.

這款太陽鏡選材自歐洲大時尚的復古美學，黑金配色和幾何紋理參考了裝飾藝術風格，代表著奢華、魅力與奔放。飛機司風鏡框形眼鏡，尤如穿梭古今。

The aviator shape made by brown tortoise color acetate, and installed metal bar in geometry pattern in gold plating color. And the gold plating color temple with geometric pattern which installed the Swarovski crystal on the top. It is more shiny and attractive. The geometry pattern looks iconic, but not much or too strong. It is simple, but mix and match and fruitful.

飛機司風大鏡框，配上經典啡色玳瑁醋酸膠板，再以金飾和水晶石點綴。粗上眉設計很有80年代氛圍，金屬邊線在光影下更顯搶眼。鏡牌大面積採用光身金屬，線條硬朗之餘，也不錯過雕刻細節。

金屬脾上的是長青的格子圖案，前端配以黑色水晶石，用色簡單卻能互相襯托。

ZM0571

The sunglasses design inspired by Lady GaGa, the sparkling crystals are very eye-catching, exactly the same as her superstar image. The familiar rivet outlook made her shine on stage.

這款太陽鏡以Lady GaGa為原型，閃爍的水晶十分搶眼，與她的巨星形象如出一轍。經典的鉚釘造形讓她在台上綻放光芒。

The Aviator shape with the popular teal green glitter acetate, shows the energy of rock and youth. The top bar of the frame is made of a whole row of clear crystal stones, which are more dazzling in the staggered light.

飛機司風鏡框，配上流行的湖水綠色閃粉用色，展現搖滾且年青的活力。框頂採用一整排晶瑩剔透的水晶石，在交錯的光線下更顯耀目。

Design Concept / Story 設計故事 / 概念

Wingram is a company that focused and specialized in bioplastics, that our frame is made from BioAcetate S70 material which has five main eco-advantages.

1. ISCC Sustainability Carbon Certification
2. 62 % biobased according to ASTM-D6866
3. Biodegradable according to ISO-14855
4. Harmful plasticizers free (NO DEP)
5. Biocompatibility according to ISO-10993

Wingram一直致力於生物塑料，我們的鏡架由具有五個主要環保功能的BioAcetate S70材料製成。

1. ISCC國際環保認證
2. 可生物降解 (根據ISO-14855)
3. 62%生物基 (根據ISO-14855)
4. 無DEP，通過歐盟RoHS和REACH
5. 生物相容性行為 (根據ISO-10993)

Product Introduction and Features 產品介紹及特色

BioAcetate S70 Stylish Sports Eyewear

HECA properties offer protection against deformity. Deformity in traditional CA may cause lens to fall out of frames or may cause temple/legs to be greatly uneven in height. BioAcetate S70 designed frames seeks to solve this. It's important that the frames are light and durable.

HECA properties also allow for more flexibility in designs and allows for special designs as seen in this sports eyewear, that the white and black spots shows a fun and spontaneous.

BioAcetate S70設計的鏡架具HECA特性，更輕巧耐用，且能防止變形導致鏡片從鏡架中掉出，或可能導致鏡架/鏡腿高度不均勻。

HECA特性可使設計更加靈活，實現特殊設計，白色和黑色的斑點展示了一種有趣且隨性的感覺。

BioAcetate S70 Pure Black Frame

Traditional CA material is usually only used for handmade acetate frames. Therefore because of the mechanical properties of frames made from BioAcetate S70, it allows for frames to be designed and made in injection applications as well. There are many practical advantages to this, including the scalability of this design.

傳統的CA材料通常只用於手工製作的眼鏡框架。因此由BioAcetate S70製成的鏡架具機械性能，它能夠透過注塑進行設計及製作鏡架。這設計很多實際的好處，包括鏡架的可擴充性。

LASER Barrier 激光終

There are so many LASERS product used in the market nowadays.

Although the safety goggles apply the laser protection function long time ago, sunglasses still do not in corporate this kind of functions.

So, I was created "LASER Barrier" lens for protecting his eyes and keeps him elegance.

市場上有多種不同功能的激光產品，但日常配戴的太陽眼鏡仍未有加上防激光應用。

刺激我創作出既可保護眼睛亦可保持帥氣形象的「激光終」太陽鏡片。

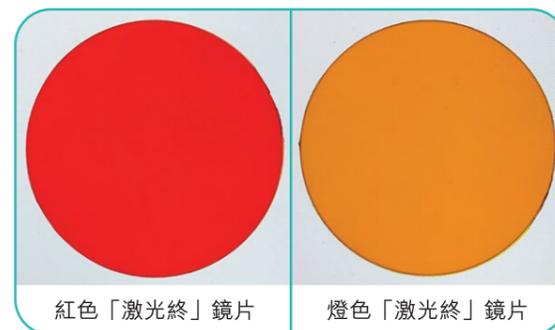

Product Introduction and Features 產品介紹及特色

There are 3 different colour of LASERs which are Red, Green, Blue in the market generally.

"LASER Barrier" are designed by different colour in different type of LASER use.

主要針對市場上紅、綠及藍三色的激光產品。因應不同激光光源，設計出相對應的「激光終」鏡片。

鏡片顏色鮮艷，有別於傳統的護目鏡。

Chromatmon 變色怪

"Chromatmon" providing more possibility for designing lens colour, even darken or before turning. It can be specifically controlled the ability and the range of turning darken by the process.

「變色怪」所能提供的顏色設計非常自由多變，通過工藝上的改變，能有效控制變色深淺能力及變色範圍。

身處戶外戶內都有不一樣的顏色效果既保護眼睛又凸顯時尚。

Vision Painter 好亮麗

In general speck, wearing sunglasses may dim sunlight and a bit of color distortion. What a pity time if you go hiking when wearing sunglasses.

"Vision Painter" may provide fully protection and minimize color distortion.

Specially to observe colorful natural scenery, "Vision Painter" provide more colorful, more contrast.

一般認為配戴太陽眼鏡之後，眼前景物色彩會變得暗淡。眼睛得到足夠保護，卻犧牲眼前景物原有的艷麗色彩，剝是可惜。

「好亮麗」鏡片既能提供足夠功能保護眼睛，同時不減亮麗。

特別用於觀看色彩交融的自然風光，每種顏色都更為立體及清晰。

Design Concept / Story 設計故事 / 概念

In the distant future, the advancement of human civilization costs the extinction of all animals and plants. When steel and flesh, past and future, reality and illusion all blended together, people started to recall the time when butterflies were still flying in the sky.

在不久的未來，人類文明高度發展，代價是地球上的動植物皆盡滅絕；鋼鐵與肉體，過去與未來，現實與虛幻在矛盾之中不斷交織，人們不禁回想起來，蝴蝶仍在天際上傲遊的日子。

Product Introduction and Features 產品介紹及特色

In recent years, foldable sunglasses are very popular in the market. The foldable function is convenient and has become a must-have item for outdoor activities enthusiasts. The design of "Turning" is based on folding sunglasses but with the innovative 360-degree hinge, it can be freely switched between 4 forms: sunglasses, glasses, folding glasses and finally the butterfly form. It stands out from other foldable glasses on the market which focus on their function. Turning's butterfly form is futuristic and easily the most eye-catching product in the shop windows, it will create major discussions amongst customers and become the best-selling item.

市場上的折疊太陽眼鏡近年大行其道，可折疊功能為攜帶上帶來便利性，成為許多戶外活動愛好者必備的物品。而蝶變的設計建基於折疊太陽眼鏡上，不單配上全新設計的360度鉸鏈，更加上可以由太陽眼鏡->配光眼鏡->折疊眼鏡->蝴蝶外型的4種形態自由改變，打破市場上折疊眼鏡只注重功能性的常態。而蝴蝶形態未來感十足放在櫥窗內十分吸引目光，必定會成為客戶詢問度極高的配飾單品。

Design Concept / Story 設計故事 / 概念

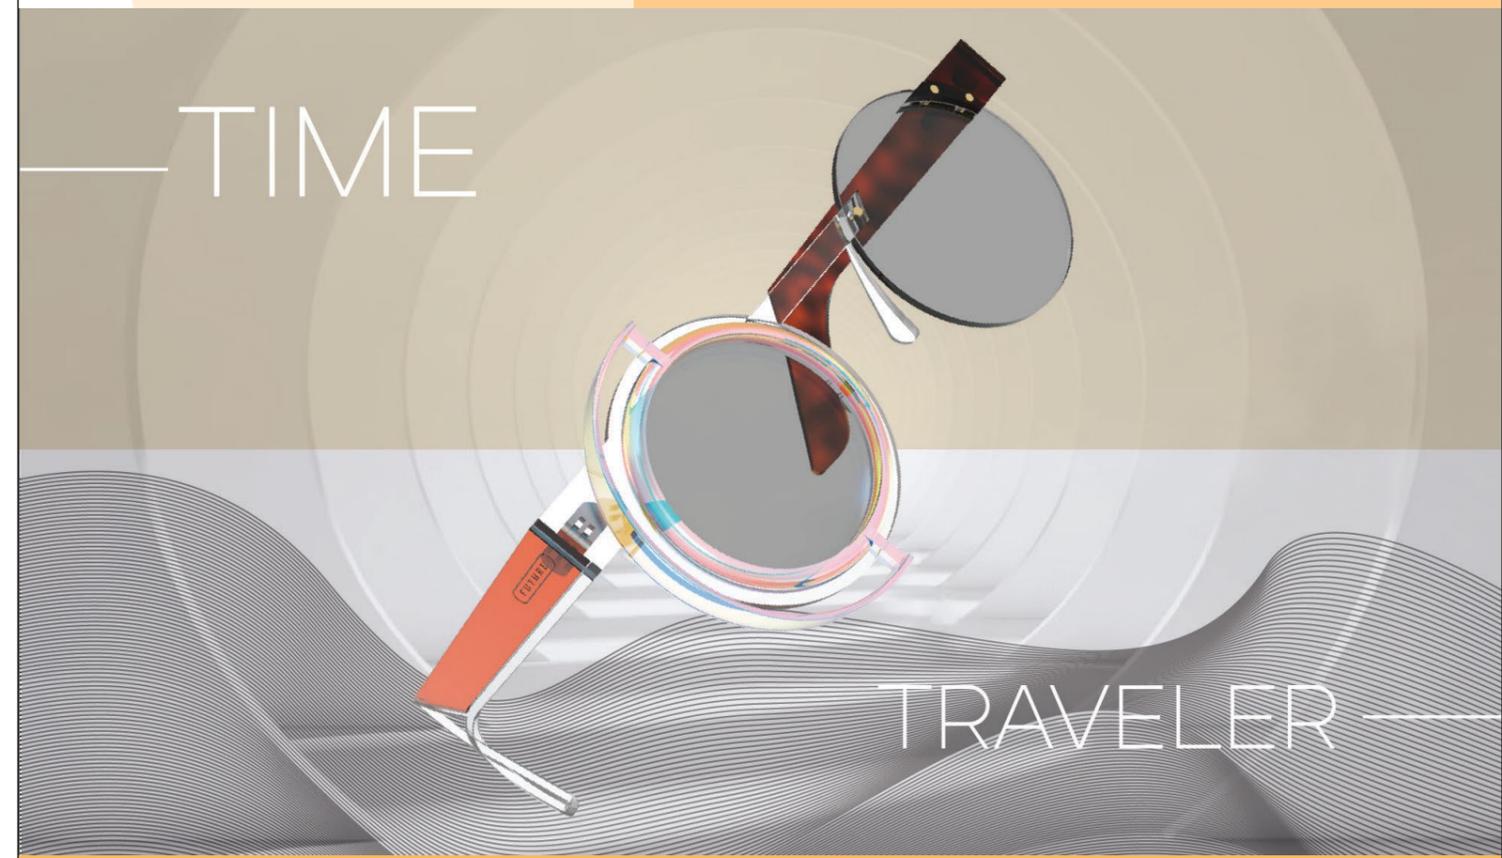

Everyone has their own definition of future. For us, the future is "time travel" and therefore, we have crafted the concept of time travel journey into the glasses design.

每個人對未來的定義和嚮往都不一樣，對我們而言，人們一直憧憬着「時間旅行」的出現，而我們相信這是將來有機會發生的。所以我們嘗試將時間旅行的過程演變成眼鏡視覺設計，利用兩種不同風格的設計呈然時間旅行的發生。

Product Introduction and Features 產品介紹及特色

The design is divided into left and right sides. The left side represents the past through the use of traditional materials and techniques, while the right side represents the future with the touch of bolder appearance and colour tone, bringing out the perfect fusion of the past and the future.

眼鏡設計分為左右兩邊，採用玳瑁色物料及傳統工藝的左邊代表過去，玳瑁工藝在中國已有上千年的歷史，工藝水平在唐代已達頂峰，因此左邊的鏡框設計上會比較偏向復古懷舊，而外型及色調較前衛大膽的右邊則代表未來，利用亞克力板材及幻彩鏡片呈現出前衛及創新的感覺，利用眼鏡左右不同的設計風格襯托出新舊交融的時空穿梭。

Design Concept / Story 設計故事 / 概念

In real life, Morphogenesis is the biological process that causes an organism to develop its shape, by controlling tissue growth and patterning of cellular differentiation. Morphogenesis is essential for the evolution of new forms.

We are currently in the 21st century digital age, in midst of a bionic revolution. This design aims to encourage viewers to embrace a transhuman aesthetic and be reminded that we are responsible for our own evolution. The human identity has changed so significantly since the dawn of civilization. Today, society accepts and practices nanobiotechnological enhancement of humans, altering our natural limits. For instance, by wearing physical wearable aids like glasses and prosthetics.

在現實生活中，形態發生是一種生物過程，通過控制組織生長和細胞分化模式，使生物體發展其形態。形態發生對於新形式的進化至關重要。

我們正處於21世紀，目睹著生物技術的革命。此設計希望觀眾接納‘超人類’的美學，想像我們超越人類的未來。自文明以來，人類身份發生了巨大變化。今天，社會接受並實踐了人類納米生物技術，也自然化了可穿戴輔助設備(例如眼鏡和義肢)。

Product Introduction and Features 產品介紹及特色

Features

The goal is to create Avant garde eyewear that celebrates malleability and individualism. The designer imagines an accessory that has more than the typical 2 lenses. Each lens rendered here potentially serves a different purpose, such as magnification, polarizing of light, and color enhancement. The end result is a whimsical commentary on our future of being more than human.

Proposed Manufacturing Details

Frames are to be 3D printed, made to order using Selective Laser Sintering (SLS) in slightly flexible but sturdy materials like Nylon or Elastomeric Polyurethane.

特色

我的目標是製作出能讚美延展性和個人主義的前衛眼鏡。每個鏡片可有不同特質，例如顏色，功能等。

製造技術

框架將使用激光燒結 (SLS) 3D打印，採用柔韌但堅固的材料，例如尼龍或彈性聚氨酯。

Morphogenesis

Morphogenesis received the Creativity Award for the 22ND HK Eyewear Design Competition.

PARALLEL UNIVERSE 平行時空

Design Concept / Story 設計故事 / 概念

The concept of the parallel universe inspires the design. The geometric and parallelism structure influenced the eyeglasses just as the infinity timelines and life intersection.

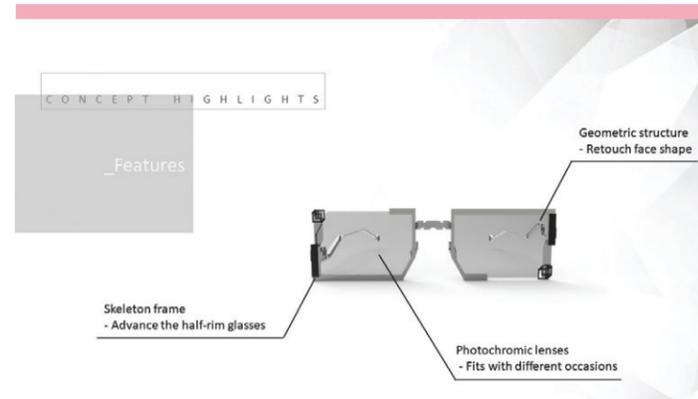

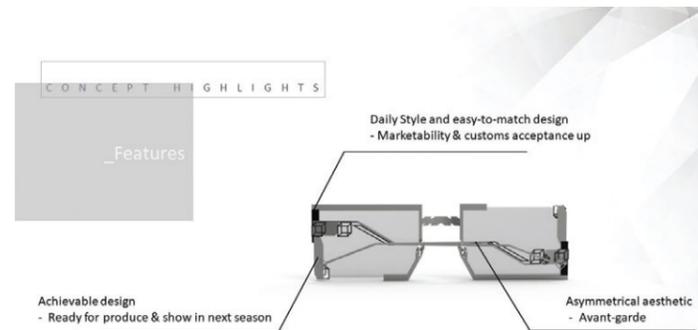

The frame is asymmetry, with one bend starting on the upper frame and another on the lower frame. The middle of the bends begins to join towards the centre and share the same plane. They are overlapping on the side view but aren't on the other perspectives. Also, the bends are passed by each other ideally and just right, a metaphor for the infinite possibility in the parallel universe.

靈感來源是從平行時空的概念而來，眼鏡由平行線及幾何線條組成，這些線條像時間線和人生交叉的抉擇，也為這設計帶來未來和科技感。

眼鏡架為不對稱設計，兩側的臂框一邊在鏡框上方延伸，一邊在下方延伸。這雙不對稱的臂框在中段開始向中心點移動，在側視圖看起來是重疊的，但在其他角度卻沒有交集。把臂框收起來兩臂更是剛剛擦身而過，隱喻在平行時空中的我們，未來有着無限的可能性。

Product Introduction and Features 產品介紹及特色

不對稱的美學結合未來和科技感。幾何結構外型設計突出奪目，能修飾面形。突破傳統半框眼鏡，半繞空框架鑲嵌車角鏡片更突出工藝。鏡片採用全視線鏡片，日常風格和百搭設計可以提高客戶認受性和市場性。配合目前技術和工藝，以低成本和開花時間得已生產。

Design Concept / Story 設計故事 / 概念

Today's digital fabrication technologies as well as advancement in 3D design tools are allowing designers to explore forms that are breaking away from old conventions of mass manufacturing. We are ushering a new, exciting age, where organic, ambitious forms can be produced reliably and consistently through techniques such as 3D printing.

The OSSEON design concept revisits the popular cat's eye frame silhouette, enhancing it with immense levels of detail that invites viewers to take a second look. Surface undulations of the design blur boundaries between the exterior and interior, and draws viewers' eyes on a sculptural adventure.

現時3D科技發達，電子設計工具的進步使設計師勇於脫離工廠式設計模式及局限。迎面而來的是一個激動人心的新時代-極具創意，流暢的線條，人手無法雕出的豐富細節等...

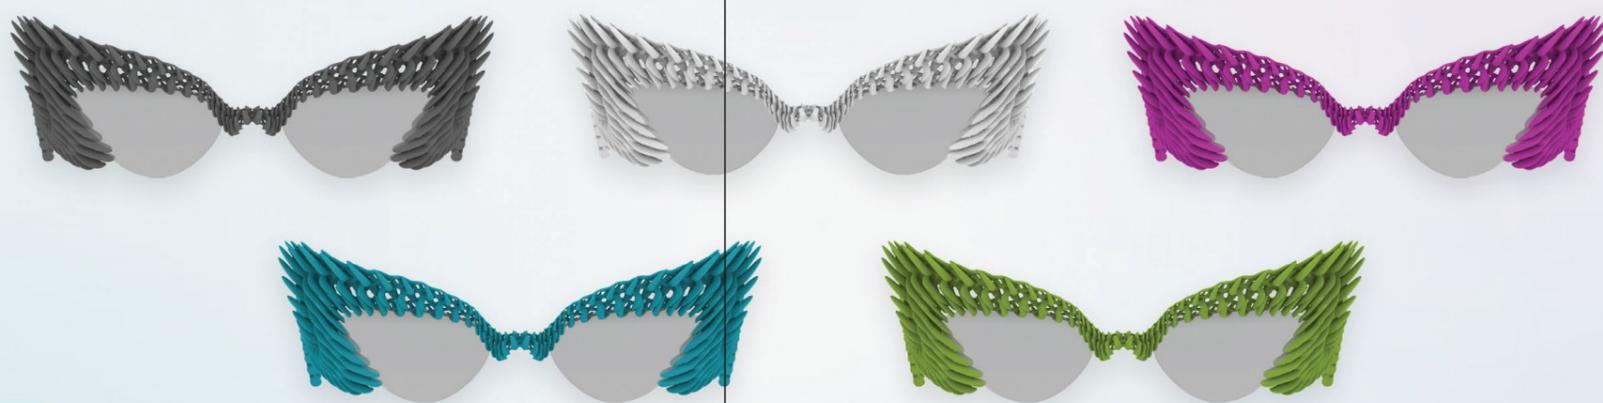

OSSEON的設計重新詮釋了復古的貓眼鏡框。通過出乎意料的網狀層次，大膽前衛的細節，設計師邀請觀眾體驗富有未來感的嫵媚。

Product Introduction and Features 產品介紹及特色

Using selective laser sintering process (SLS) for 3D printing this design in tough, flexible PA12 nylon, we allow the whole frame to be produced as one piece, reducing manpower costs for assembly. The mesh-like inner framework is pliable, enabling the stems to be folded inwards for storage without the use of mechanical hinges, or outwards to accommodate various head sizes.

使用堅韌、靈活的PA12尼龍，激光燒結3D打印 (SLS) 而成。整個框架作為一件生產，減少人工成本。

Design Concept / Story 設計故事 / 概念

Fully submerge in a world of cyberpunk. A design that infuses neon light into robotics.

Eyeglasses that glow in the dark with infinite depth like neurons network.

A whole different world inside your glasses.

一個能融入賽博龐克的世界的設計。一個充滿霓虹燈和機械而工業化充滿菱角的設計。

眼鏡螢光發光營造出高科技電子產品運作時發光的感覺。

結合無限鏡子效果令眼鏡看似擁有無限的深度並連接到一個無限大的空間。

Product Introduction and Features 產品介紹及特色

The eyeglasses frame was made of two semi-reflective metals with phosphor powder between.

When viewed outside it will have the effect that the frame has an infinite depth to it.

兩片半透鏡亚克力夾著螢光粉在眼鏡上組成無限鏡子走廊效果能在薄薄的鏡框下看到無限的深度。
