Hong Kong Optical Manufacturers Association (HKOMA) Annual Directory 2019 President's Foreword

Hong Kong is an important exporter of spectacles. In the first nine months of 2018, Hong Kong's total exports of spectacles, lens and frames amounted to about USD2 billion. Our major export markets are the United States, followed by Italy and the Chinese mainland.

Hong Kong's spectacles companies specialize in making medium to high-end frames. We mainly produce for overseas buyers and renowned international brands on an Original Equipment Manufacturing (OEM) or Original Design Manufacturing (ODM) basis with their manufacturing bases on the Chinese mainland. We are able to cope with small orders and offer extensive range of frame designs. Hong Kong eyewear brands are also growing in global market. Many local companies shifted their business focus from OEM and ODM to Original Brand Manufacturing (OBM).

Technological investments such as advanced machinery and information technology are substantial for large-scale manufacturers in improving their production efficiency and product design. They are equipped with 3D CAD/CAM technologies and computer numerically controlled (CNC) production lines to enhance their design and streamline the production process.

In 2018, with the funding support from SME Development Fund of Trade and Industry Department, HKOMA and HKPC collaborated once again to have launched the "Eyewear Engineering Design Guidebook for Better-fit" project, aiming to enhance the quality and competitiveness of industry through promoting and demonstrating "Better-fit" design with the state-of-art technologies, whilst updated the Asian population head form database.

In view of the marketing strategies of international known brands and the reflection of market consumption, product brands have become more diversified, instead of focusing on a single category. Under these circumstances, HKOMA established an affiliated branch – Hong Kong Eyewear Designer Club (HKEDC) at the end of 2016. In the past two years, under the "Excellence of Hong Kong Eyewear Design" scheme, which is funded by Create Smart Initiative of CreateHK, HKEDC and HKPC collaborated to explore local design elites and cultivate young talents for the industry. Meanwhile, HKEDC is planning to launch its home brand product - [HKOMA] eyewear collection to develop the mainland market. Its first eyewear design special [Hong Kong Theme] series was showcased in the Hong Kong Optical Fair last year.

Looking ahead, Hong Kong eyewear manufacturers have strong resilience and are convinced that they can cope with the global economic slowdown and competition with their neighbors. We not only have a keen sense of the trend, but also actively promote and invest in new technologies. This innovative spirit has enabled Hong Kong to continue to be the preferred original design and manufacturer of the world's leading brands, and to help Hong Kong manufacturers developing their own local brands.

President

Hong Kong Optical Manufacturers Association

香港是世界重要的眼鏡出口地，在今年首9個月，香港「眼鏡、眼鏡片及框架」的出口總值約20億美元，主要出口市場為美國、意大利及中國內地。

香港眼鏡廠商擅長生產中高檔眼鏡框，可承接小批量訂單，提供多元化的式樣設計，以原件製造(OEM)及原創設計(ODM)等模式，為海外買家及國際品牌製造產品或進行貿易。業界面對來自鄰近地區同業的激烈競爭，有些更把業務焦點轉移到原創品牌(OBM)，向其他市場推廣自家品牌眼鏡。

部份廠家投入資金，購置先進機器及資訊科技設備，藉此提高生產效率及改良產品設計。他們借助 3D CAD/CAM (電腦輔助設計/電腦輔助製造)技術及建立CNC(電腦數據控制)生產線，提升設計水平及精簡生產過程。

香港中華眼鏡製造廠商會和香港生產力促進局為了讓眼鏡業界更掌握到3D頭模數據庫在眼鏡設計方面的概念和應用，特展開針對亞洲人的面形作深入統計分析的項目。在2018年初獲香港特區政府的中小企(SME)基金成功批核資助，建立「Better-fit 眼鏡工程設計指引」計劃，目的是為香港眼鏡業界自行開發一套具針對性的3D頭模數據庫和眼鏡工程設計指引，以能為客戶訂造切合亞洲人面形的眼鏡。

同時，國際大品牌的營銷策畧及市場消費的反映，業內品牌已趨向產品多樣性及並不再只專注於單一產品類別，而是以全身個人形象為切入點的一籃子品味配襯，為品牌的必要元素，眼鏡亦納入為其中一項形象產品。鑑此，香港中華眼鏡製造廠商會於2016年底成立了一個屬會 - 香港眼鏡設計師業會，在創意香港的「創意智優計劃」資助下，在過去兩年，香港中華眼鏡製造廠商會聯同香港生產力局攜手推行了「卓越眼鏡設計」推廣項目，通過一系列活動來提升香港眼鏡業界的創新形象，並發掘本土設計精英，為業界培育年輕人才。而香港設計師業會現計劃推出商會自家品牌 - [HKOMA] 以開拓眼鏡產品內地市場，其首個眼鏡設計專項 [香港情懷] 系列已安排在去年的香港眼鏡展中以專題產品展覽。

展望未來，香港眼鏡廠商抗逆能力強，深信定能應對環球經濟放緩，和周邊同業的競爭。我們不單具備敏銳的潮流觸覺，而且積極提升及投資新技術。這種創新精神使香港得以繼續成為全球知名品牌首選的原創設計及生產製造商，亦有助香港廠商建立本土品牌。

Congratulatory Message from the Executive Director of Hong Kong Trade Development Council

On behalf of the Hong Kong Trade Development Council (HKTDC), I would like to offer heartfelt thanks to the Hong Kong Optical Manufacturers Association (HKOMA) for its invaluable work in support of Hong Kong's flourishing optical industry over the past year.

As a regional hub for innovation, industry and trade, Hong Kong continues to retain its status as one of the premier markets in the global optical business. Underpinned by the support of the HKOMA, Hong Kong's exports of spectacles, lenses and frames totalled US\$1.9 billion in the first three quarters of 2018. Among the best-performing markets were Australia, India, Indonesia, Japan, New Zealand and the Philippines, each achieving double-digit growth over the same period in 2017.

The highlight of the year was undoubtedly the 26th edition of the Hong Kong Optical Fair, which drew more than 16,800 buyers from 111 countries and regions – an increase of 4% compared to the previous year. The number of buyers from emerging markets continued its steady rise, with more traffic from the Mainland China, Malaysia, the Philippines and Russia. The attendance of buyers from mature markets – including France, Germany, Japan, Korea, Spain, the United Kingdom and the United States – also showed significant growth, underscoring the Fair's position as a prime sourcing platform for the global eyewear industry.

Featuring a record 810 exhibitors, showcasing the best products from 23 countries and regions, the 2018 event put a strong focus on new technologies, with the inaugural IT Solutions & Shop Fittings zone displaying the latest innovations and technological trends, including 3D eyewear printing. The ever-popular Brand Name Gallery showcased more than 225 leading international eyewear brands, highlighting the huge diversity and sheer creativity of this exciting industry.

The 16th Hong Kong Optometric Conference was held during the Fair with the theme "The Contemporary Role of Optometrists in Primary Care". Featuring renowned speakers from Canada, Hong Kong, the Mainland China and the United States, the conference gave a top-level view of some of the key issues affecting the optometry industry. Another Fair highlight was the display of award-winning entries from the 20th Hong Kong Eyewear Design Competition. Jointly organised by the HKTDC and the HKOMA under the theme of "Smart Living", the competition put a spotlight on the creative skills of Hong Kong's up-and-coming eyewear designers.

The ongoing partnership between the HKTDC and the HKOMA remains a crucial factor in the continued development of Hong Kong's optical industry and its success in the years to come. We wish the association and all its members a happy and fruitful 2019.

Promote “Better-Fit” Eyewear Design · Build 3D Asian Headform Database

Most of the optical manufacturers cater to customer requirements for eyewear design and development. They follow strictly on customer instructions and details like brand position, manufacturing techniques, color, dimensions, etc.. However, headform varies with different factors including age, gender and ethnics. In recent years, “Better-Fit” has become an essential selling point in the market. However, most of the Asians are still unable to find a well-designed glasses that fits his/her headform. To cope with this situation, designers, manufacturers and brand owners need an innovative and advanced methodology —— “Better-Fit” design.

In 2018, Hong Kong Optical Manufacturers Association Limited (HKOMA) was granted SME Development Fund (SDF) from Trade and Industry Department (TID) of HKSAR government to join hands with Hong Kong Productivity Council (HKPC), launching a project titled **“Development of Eyewear Engineering Design Guidebook for Better-fit”**. This targets to enhance the quality and competitiveness of Hong Kong eyewear manufacturing industry, promoting and demonstrating “Better-Fit” design.

A 3D digital Asian headform digital database will be built, along with the undergoing development of the “Eyewear Engineering Design Guidebook for Better-Fit”. The guidebook aims to demonstrate the use of headform features, and the technique to combine ergonomics, engineering and aesthetics for the design and development of Asian “Better-Fit” eyewear. A new set of physical headform models will also be fabricated by 3D printing, based on the data acquired in the project. With the support of the members in the Association, the University of Hong Kong (LKS Faculty of Medicine), the Chinese University of Hong Kong (CUHK Eye Centre), some headform datasets have already been acquired and are now undergoing analysis. The data is classified into 8 groups:

- Asian Male Adults – Big face
- Asian Female Adults – Big face
- Asian Male Adults – Small face
- Asian Female Adults – Small face
- Asian Boys – age 11-18
- Asian Girls – age 11-18
- Asian Boys – age 6-10
- Asian Girls – age 6-10, for analysis of headform features

The project objectives have also been promoted in HKOMA’s booth during Hong Kong Optical Fair 2018. Meanwhile, the 3D scanning technology used for headform data collection in the project, was demonstrated as well. Workshops will be organized in mid-2019 for 3 half-days, focusing on “Better-Fit” design application and prototyping, with the guidebook and database as training materials. The project deliverables and conclusion will also be uploaded to HKOMA’s website at later stage.

推廣「Better-Fit」眼鏡設計 建立亞洲頭型數據庫

現時大部分眼鏡廠商主要因應客戶需求進行設計及生產，嚴格跟隨客戶指示及其細節如品牌定位、生產方法、顏色、尺寸和視覺觀感。可實際上，頭型取決於不同因素包括年齡、性別、種族等。因此，為提升配戴者的舒適度和眼鏡的合適度，設計師、生產商及品牌所有者均需一套創新先進的工程設計指引——「Better-Fit」。

香港中華眼鏡製造廠商會透過香港特別行政區工業貿易署轄下的「中小企業發展支援基金」資助，聯同香港生產力促進局，開展了「編制更適合亞洲人的眼鏡工程設計指引」項目，向香港眼鏡業推廣及示範「Better-Fit」設計，提升競爭力。

本項目將建立一個3D電子亞洲頭型數據庫，並編制「Better-Fit」眼鏡設計指引書，示範運用頭型特徵，且結合人體工學、工程學及美學三者，設計出更適合亞洲人的眼鏡。除3D電子頭型外，亦會基於是次搜集的數據，建立新一套3D實體頭模，供業界作設計參考。在本會會員、香港大學(李嘉誠醫學院)、香港中文大學(香港眼科醫院私家診所)的鼎力支持下，項目已成功採集多個成人及小童的頭型數據，正進行與眼鏡設計相關的統計及頭型特徵分析。數據分為八大類：

- i) 亞洲成年男子 - 大臉
- ii) 亞洲成年女子 - 大臉
- iii) 亞洲成年男子 - 小臉
- iv) 亞洲成年女子 - 小臉
- v) 亞洲11-18歲男童
- vi) 亞洲11-18歲女童
- vii) 亞洲6-10歲男童
- viii) 亞洲6-10歲女童

在2018年香港眼鏡展，此項目已於在本會的展位作出宣傳，並即場示範用於頭型數據採集之3D掃描最新技術。為進一步向香港眼鏡製造業示範及說明「Better-Fit」設計，此項目將於2019年中舉辦3場工作坊，並把項目成果及電子數據庫上載到本會網站。

“Excellence of Hong Kong Eyewear Design” to promote local innovative eyewear design

Hong Kong eyewear design demonstrates the sense of trend and practicality. No matter it is a fashionable optical glasses, trendy sunglasses, presbyopic glasses, children glasses etc., the designs reflect innovative ideas of local designers. Hong Kong eyewear designs are renowned for their innovation; some are pursued by consumer worldwide.

To promote Hong Kong eyewear design, Hong Kong Optical Manufacturers Association Limited (HKOMA) was granted Fund on CreateSmart Initiative (CSI) from Create Hong Kong under Commerce and Economic Development Bureau of HKSAR government in 2017. The Association jointly organized a project with Hong Kong Productivity Council titled “Cultivation of Hong Kong Eyewear Designer – Promotion of Hong Kong Eyewear Design”. The aim of the project was to promote Hong Kong eyewear designs and to raise the reputation of local designers through exhibitions in trade fairs and shopping malls in Hong Kong.

Five eyewear design workshops were organized with the themes of Innovation Design, Brand Establishment, Marketing Development, Eyewear Manufacturing and 3D Design etc. Honorable speakers from different fields were invited to share their views related to eyewear design and branding.

21 local eyewear designers, including professionals and students were selected for “Excellence of Hong Kong Eyewear Design”. Their products were edited into a 3D e-book and displayed in Hong Kong Optical Fair 2017 and HKTDC Design Gallery for promoting Hong Kong local eyewear designs. Another highlight of the project was two roadshows, one held at K11 and the other one at Langham Place. The excellence and creative image of local eyewear designers as well as their products were displayed to the public in the two roadshows.

HKOMA appreciates the funding support from the Government of HKSAR, and the effort of Hong Kong Productivity Council in implementing the project. We would also like to thank for all local designers, industrial organisations and institutes for participating in the project. We look forward to the closer collaboration with all of you so as to support the sustainable development of Hong Kong eyewear industry.

「卓越眼鏡設計」推廣本土設計的創意

香港眼鏡設計聚集潮流與實用性於一體，無論是時尚光學眼鏡、潮流型格的太陽眼鏡、實用老花鏡、精巧兒童眼鏡、或多功能的鏡片配件等，都能展示設計師的創意。眼鏡設計師的創意層出不窮，因此香港眼鏡設計不乏代表之作，一些香港設計更跳出香港，深受國際市場歡迎。

為了推廣香港眼鏡設計、培育本土優秀的眼鏡設計師，香港中華眼鏡製造廠商會於 2017年成功申請香港特別行政區政府商務及經濟發展局轄下的創意香港創意智優計劃資助，與香港生產力促進局攜手合作，舉辦題目為「培育本地眼鏡設計人才，推廣香港眼鏡設計」的項目，旨在提升本土眼鏡設計師的素質及知名度，並宣傳香港眼鏡設計師及其設計，讓更多公眾及業內人士欣賞本土眼鏡設計的特色，認識本地眼鏡設計師。

項目舉辦了五場眼鏡設計工作坊，內容涵蓋創意設計、品牌建立、市場發展、眼鏡設計製造及3D設計等主題，邀請本地、國內及海外不同界別的講者，與眼鏡業及其他相關設計的從業員及學生分享專題，帶來創新設計的知識及啟發。

同時透過「卓越眼鏡設計」招募及甄選了21個本地眼鏡設計師的設計產品，包括專業作品及學生作品。這些作品不但收錄編輯成電子書，更於香港眼鏡展公開進行展示，並同期在香港會議及展覽中心的设计廊展出。值得一提的是項目在2018年年初分別於尖沙咀K11購物藝術館及旺角朗豪坊進行兩場路展，把香港本土優秀的眼鏡設計作品呈現公眾眼前，推廣香港眼鏡業的創新形象，為項目的一大亮點

項目能成功舉辦，本會多謝多位香港眼鏡設計師、業界及學界人士的鼎力支持及參與。同時感謝「創意智優計劃」的資助及香港生產力促進局協助項目的執行。本會期望與各友好平台緊密合作，並團結香港眼鏡業界，彼此交流分享本土創意設計，共同推動及扶持業界的發展。

Classic and Timeless -System 3 Nose Pads-

F&W Frey & Winkler has a 60 years reputation as component supplier to the ophthalmic industry and whether PVC or silicone nose pads, F&W is the leading address for significant developments and innovations.

One of the ground-taking innovations has been the development of the System 3 fixing system, where a pure silicone nose pad (BPA free) is simply pushed through the opening of the pad arm. This fixing system soon became a trendy alternative to ordinary fixing systems like screw on or click in.

Started with one size back in 2001, today customers can choose between a wide range of shapes, sizes and colours – even a pad with the famous air cushion effect is available within System 3 line.

Over the past 60 years, more than one billion spectacles have been equipped with F&W components - and there are many more to come!

100% Made in Germany in own facilities and with tested materials only

第三制式是其最具突破性的產品之一，全矽膠製造，不含 BPA，防敏感，安裝簡單，祇需一按便能套上托臂。自推出以來，便立即成為傳統制式以外的流行指標。

自2001 年推出首個款式至今，F&W 共開發了十多款不同形狀，大小及多種顏色的型號。當中還包括享負盛名的氣墊形鼻托。而此系列的型號，仍一直不斷在開拓擴展中。

在過去六十年間，全世界已有超越十億副眼鏡安裝了 F&W 的產品。

鎂鋁合金 沿用於其他工業產品，如拉杆行李箱、汽車輪框等。現時亦已經被改良用於眼鏡工業。

其優點是較輕，但對比鈦金屬為硬，價格方面與不銹鋼相同。

而鎂鋁合金的另一特點是可以真空鍍上不同顏色。其將成為未來眼鏡主流材料。

Magnesium-aluminum alloys have been used in the industrial products, such as pulling luggage and automobile wheel frames, etc. It is improved for the optical industry at present.

The advantage is that it is lighter, but compare to the titanium, it is harder, and the price is the same as stainless steel.

Another feature of magnesium-aluminum alloys is that they can be vacuum-plated in different colors. Therefore, it will become the mainstream material for future glasses.

鈷合金 沿用於大型建築工程工具，例如：鑿洞的鑽頭，或普遍用於家用工具的小型鑽咀等。

這種材料的顏色與鎳相同，但與鎳相比沒有它的缺點，而價格比鎳低百份五十以上。

現正加緊改良適合於眼鏡配件用途，如較鏈，夾口，坑線等。如果成功推出市場，將能夠令金屬眼鏡框架材料的成本大幅度下降，而成為金屬架一次空前革命。

Cobalt alloys are usually used in large-scale construction engineering tools such as the chiseled hoe for cave, or the small drill of household tools.

The color of this material is same as Nickel, but it is without the disadvantages in compare to Nickel, and the price is less 50% more than Nickel.

It is now under an improvement study for the usage of eyeglass accessories, such as hinges, rim-locks, and eye-rims, etc. If the market is successfully launched, it will be able to reduce the material cost of metal eyewear frames, and become an unprecedented revolution in this subject.
